H. Was this a fun game to play? Why or why not.

This game can be fun depending on the person, however I personally did not enjoy this game. I think this would be a great fighting game for a family and is really easy to understand, but for me there just wasn't enough to do and the absence of move combos which are present in most fighting games the combat wasn't engaging. Also, even if the enemy is standing still your punches miss a lot they just curve around them and it can be very frustrating.

I. If you think that the game could be better, explain how you think it could be better:

This game could be better if there were abilities and things to do while in combat.

J. If you had problems when playing the game, what were the problems:

I also experienced some problems while playing. Sometimes I would be using motion controls and I would just randomly stop moving and I couldn't move for a few seconds.
