Course Description:
This course covers advanced topics in Dreamweaver. Topics include using layers, styles, and automation to create Web pages. Topics also include using Dreamweaver with JavaScript and other Web components. Students should be familiar with Dreamweaver.

Course Objectives:
Upon completion of this course the student will be able to:

- Explain relationships among HTML, XHTML, XML, and CSS
- Enhance Web page accessibility using layers
- Choose a server model and develop a simple dynamic application
- Pass data between Web pages
- Create a form to collect data from the user and populate an email message with form data
- Connect a website to a database and filter the data
- Authenticate users and restrict access to pages

Course Text:

Supplies:
Fullerton College ID and Lab Account
2-3 - 3 ½” High Density Diskettes
1 Scantron-882

Attendance:
Attendance is directly tied to academic performance, therefore, students are expected to attend class. Attendance is recorded for each class session. Students are expected to be present at the beginning of each class meeting. Students are expected to complete two lab hours each week. Some weeks will require more lab hours and some weeks will require less. In the case of lab hours, your preparation and planning will be essential.

**It is the responsibility of the student missing a class to get notes or information from another student.**
NOTE: If a student misses more than 2 classes, it is the prerogative of the instructor to fail or withdraw that student from the class. However, it is the student's responsibility to drop the class if so desired.

Course Grading: This course is based upon a cumulative number of points earned for projects and exams. Remember, if you are not in class, you will not be able to complete the in-class assignments. The grading breakdown is as follows:

<table>
<thead>
<tr>
<th>Grading Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>In-class and lab exercises</td>
<td>35%</td>
</tr>
<tr>
<td>Project 1 &amp; 2</td>
<td>30%</td>
</tr>
<tr>
<td>Midterm Exam</td>
<td>15%</td>
</tr>
<tr>
<td>Cumulative Final Exam</td>
<td>20%</td>
</tr>
<tr>
<td>TOTAL</td>
<td>100%</td>
</tr>
</tbody>
</table>

Grading Scale:

- A = 90 – 100%: Performs consistently at the highest level and has a thorough mastery of virtually all material.
- B = 80 – 89%: Performs consistently at a high level and has a substantial mastery of the majority of the material.
- C = 70 – 79%: Performs at an average level and has an average mastery of most of the essential material.
- D = 60 – 69%: Performs at a minimally competent level and has a marginal mastery of the minimal essential material.
- F = 0 – 59%: Student does not perform at a minimally competent level and does not have a marginal mastery of the essential material.

Withdrawals & Drops: While a teacher may officially withdraw a student who has poor attendance, it is the student's responsibility to withdraw if the student decides not to, or is unable to continue in the class. Failure to do so may result in the student receiving a failing grade. (See College Catalog – Academic Regulations section)

Academic Honesty: Students enrolled in this course are expected to maintain the highest standards of academic integrity and honesty. All assignments completed and turned in must be the exclusive and original work of each student. A student may be dropped from the class or may receive a failing grade for the class if he/she copies another student's assignments, allows another student to copy his/her assignments, or cheats in any other way. (See College Catalog – Academic Regulations section & page attached)

Safety: Please take note of the safety features in and close to your classroom, as well as study the posted evacuation route. The most direct route of egress may not be the safest because of the existence of roofing tiles or other potentially hazardous conditions. Similarly, running out of the building can also be dangerous during severe earthquakes. During strong quakes the recommended response is to duck—cover—and hold until the shaking stops. Follow the guidance of your instructor. You are asked to go to the designated assembly area. Your cooperation during emergencies can minimize the possibility of injury to yourself and to others.

Fullerton College is committed to providing reasonable accommodations for students with disabilities upon request of the student (in a timely fashion) and upon verification of disability.
### Uploading/ Publishing Assignments

Make sure you pay close attention to the upload/publishing process (and take good notes) whenever the instructor reviews this information. Publishing is one of the most important elements of Dreamweaver. It can also be one of the most frustrating. You **will need** a lab account to publish to the Fullerton College server.

**Please note:**

Dreamweaver has built in features to make Website management very efficient. Please take advantage of these features and **DO NOT** try to manually upload, copy, or FTP your files to the W: drive or any other network place.

### General Information

- Please turn off **all pagers and cell phones** during class.
- **LATE ASSIGNMENTS WILL NOT BE ACCEPTED.**
- Homework will involve reading ahead the Chapters/Projects covered **before** the class and completing the assigned exercises and projects.
- To receive the **maximum** grade, it is expected that students pay attention during class, take notes during lecture, ask questions, collaborate, and complete all assignments and required readings.
- **Keep all work until you receive your final grade. In the event of a grade dispute, your work will serve as evidence of completion.**
- Check [http://staffwww.fullcoll.edu/lmelella](http://staffwww.fullcoll.edu/lmelella) at least twice a week for your course schedule, assignments, and for additional course information.
- Please review the Fullerton College Academic Honesty Policy and Acceptable Use Policy and complete, sign, and return the attached sheet.
